## 0.0 Introduction

With all Pcounter Embedded products it is possible to manually modify much of the text used. This document is a master guide for customizing the text of all Pcounter Embedded products.

## 1.0 Supported Languages

All Pcounter for Embedded products support the following languages natively without the need for customization: English, Spanish, French, Italian, German, Portuguese, Finnish, Dutch, Czech, Swedish, Danish, Polish, Norwegian, Hungarian, and French Canadian.

The language used by the Pcounter Embedded application is defined in Global Settings.  
e.g.

## 2.0 Customize Text

**NOTE:** This process should not be used to change languages. Please use the Global Settings Language dropdown to change language.

- 1) Use Notepad to create a file named **pcounterEmbeddedText.ini** and place it at:  
C:\Windows\Syswow64\pcounter\ (use System32 if server is fully x86)
- 2) Use Notepad to edit the file and add the text [Strings] to the first line.
- 3) Use the master list below to add only the desired modifications, for instance:  
1 = Your login name or password is wrong
- 4) Not all entries below are required to be present in pcounterEmbeddedText.ini. Only add the entries that are being customized.

[Strings]

0 = Logon failed.	40 = Unknown card
1 = Your user name or password is incorrect.	41 = Enter the account to associate with the card.
2 = Your account balance is too low.	42 = Favorites
