## 0.0.0 Introduction

Pcounter for Kyocera is server software that is intended to reside on a Window server.

Pcounter for Kyocera is used to control walkup user access (**authentication**) to Kyocera MFPs as well as capture walkup usage (**accounting**) for copy, scan, and fax.

A quick technical note; MFP = Multifunction Printer, and in this instance the MFP is the Kyocera printer being configured.

## 0.0.1 Trial Period Information

Without a valid registration number, the Pcounter for Kyocera software runs will run with full functionality for 90 days in trial mode. During this time there are no restrictions to the software’s functionality and it can be used for testing all features. At the end of the trial period a valid registration number must be inserted, or the software will no longer function until a valid registration number is entered.

## 1.0.0 Goal

The goal of this document is to provide a list of supported MFP models for Pcounter Embedded for Kyocera.

### 1.1.0 What is Pcounter for Kyocera

Pcounter for Kyocera is Windows server software that interfaces directly with the embedded operating system inside the MFP. Pcounter for Kyocera works in combination with Pcounter for Windows.

Pcounter for Kyocera provides a point of access control (Authentication), the ability to log job based data for copy, scan, and fax (Logging), and the ability to assign page quotas or currency balances to users, debiting them for individual jobs (Accounting).

Pcounter for Kyocera combines all MFP print, copy, and scan data into a single log file managed by the Pcounter for Windows Data Server. Reporting can then be done quickly and easily for all job types using Pcounter Administrator and Pcounter Web Report.

## 1.2.0 Requirements

Please see our Pcounter System Requirements document at:

[http://apps.pcounter.com/docs/pcounter\\_system\\_requirements.pdf](http://apps.pcounter.com/docs/pcounter_system_requirements.pdf)

The Pcounter for Kyocera server software can be installed on Windows 2008R2 Server or any later Windows “business” operating system. Windows “Home” products that lack domain support are not recommended.

The Pcounter for Windows software (version 2.90a or later) must be previously installed, configured, and in use on the Windows print server before installing and configuring the Pcounter for Kyocera embedded management software on the server.

For more detailed information about Pcounter installation and administration please refer to the Pcounter Setup Guide and the Pcounter Documentation PDFs on the Pcounter Wiki at:

[www.pcounter.com/wiki](http://www.pcounter.com/wiki)

Pcounter for Windows can be downloaded from <http://www.pcounter.com>

To download Pcounter for Kyocera please contact Pcounter support at [support@pcounter.com](mailto:support@pcounter.com)

## 2.0.0 Supported Models

If the model in question is not in the supported list and confirmation is needed please email [support@pcounter.com](mailto:support@pcounter.com). The following models are fully supported by Pcounter for Kyocera:

ECOSYS M6526cidn	TASKalfa/CS 6002ci
ECOSYS M6526cidn Type B	TASKalfa/CS 5002ci
ECOSYS M6026cidn	TASKalfa/CS 4002ci
ECOSYS M6026cidn Type B	TASKalfa/CS 3511ci
ECOSYS M3560idn	TASKalfa/CS 3011ci
ECOSYS M3550idn	TASKalfa/CS 6052ci
ECOSYS M3540idn	TASKalfa/CS 5052ci
ECOSYS M3040idn	TASKalfa/CS 4052ci
ECOSYS M6035cidn	TASKalfa/CS 3552ci
ECOSYS M6535cidn	TASKalfa/CS 3252ci
FS-3540MFP	TASKalfa/CS 3552ci
FS-3640MFP	TASKalfa/CS 7550ci
