0.0.0 Introduction

Pcounter for Ricoh is server software that is intended to reside on a Window server.

Pcounter for Ricoh is used to control walkup user access (**authentication**) to Ricoh MFPs as well as capture walkup usage (**accounting**) for copy, scan, and fax.

A quick technical note; MFP = Multifunction Printer, and in this instance the MFP is the Ricoh printer being configured.

0.0.1 Trial Period Information

Without a valid registration number, the Pcounter for Ricoh software runs will run with full functionality for 90 days in trial mode. During this time there are no restrictions to the software's functionality and it can be used for testing all features. At the end of the trial period a valid registration number must be inserted, or the software will no longer function until a valid registration number is entered.

1.0.0 Goal

The goal of this document is to provide a list of supported MFP models for Pcounter Embedded for Ricoh.

1.1.0 What is Pcounter for Ricoh

Pcounter for Ricoh is Windows server software that interfaces directly with the embedded operating system inside the MFP. Pcounter for Ricoh works in combination with Pcounter for Windows. Pcounter for Ricoh provides a point of access control (Authentication), the ability to log job based data for copy, scan, and fax (Logging), and the ability to assign page quotas or currency balances to users, debiting them for individual jobs (Accounting).

Pcounter for Ricoh combines all MFP print, copy, and scan data into a single log file managed by the Pcounter for Windows Data Server. Reporting can then be done quickly and easily for all job types using Pcounter Administrator and Pcounter Web Report.

1.2.0 Requirements

Please see our Pcounter System Requirements document at:

http://apps.pcounter.com/docs/pcounter_system_requirements.pdf

The Pcounter for Ricoh server software can be installed on Windows 2008R2 Server or any later Windows "business" operating system. Windows "Home" products that lack domain support are not recommended.

The Pcounter for Windows software (version 2.90a or later) must be previously installed, configured, and in use on the Windows print server before installing and configuring the Pcounter for Ricoh embedded management software on the server.

For more detailed information about Pcounter installation and administration please refer to the Pcounter Setup Guide and the Pcounter Documentation PDFs on the Pcounter Wiki at:

<https://pcounter.wixanswers.com>

Pcounter for Windows can be downloaded from <http://www.pcounter.com>

To download Pcounter for Ricoh please contact Pcounter support at support@pcounter.com

1.0.0 Unsupported Models

The following models do not support Pcounter for Ricoh Embedded.
Please see the next chapter for a list of supported models.

MP C2000	SP 5210DN
MP C2500	SP 5200DN
MP C3000	SP 4310N
MP C3500	SP C430DN
MP C4500	SP C320DN
MP 5500	SP C431DN
MP 6000	MP 171SPF
MP 6500	MP 201
MP 7000	MP C440DN
MP 7500	SP 5310DN
MP 8000	SP 5300DN
MP 9000	SP 440DN
MP 1100	SP 435DN
MP 1350	SP C820DN
